

PRIVATE HIGH SCHOOL PROGRAM

We place hundreds of students every year in quality accredited private schools across the US. We offer a large variety of schools, all chosen for their ability to provide first rate programs and facilities in a challenging, engaging and positive environment.

Classic Program

A more affordable option. You select your top three schools from a variety of great options nationwide.

Preferred program

For those who want to choose one favorite school only.

Specialized Offerings and Facilities

Many of our schools offer extracurricular activities and/or sports that you may not find in public schools such as horseback riding, hockey, tennis or lacrosse.

It's Cool to Be Smart

Most private school students want to be there and want to learn. Equally, the schools tend to be rather selective about who they admit with strict adherence to the rules. Because of these factors, discipline issues are rarely a consideration in private school.

Host Family Involvement

Most of our families are from within the school or local community and many have hosted before. This can help with your transition into the school and local community. Even if the family is not within the school community, most private schools will ask that they get involved while being a host family.

Individual Attention

Even in larger private schools, the classes tend to be kept small. A favorable student teacher ratio means you will participate and have the individual attention you deserve.

A Balanced Program

While the major focus is getting ready for university, your personal maturation and development go hand in hand in a private school. They encourage full immersion into school life, clubs, sports and other activities that can help provide an understanding of who you are.

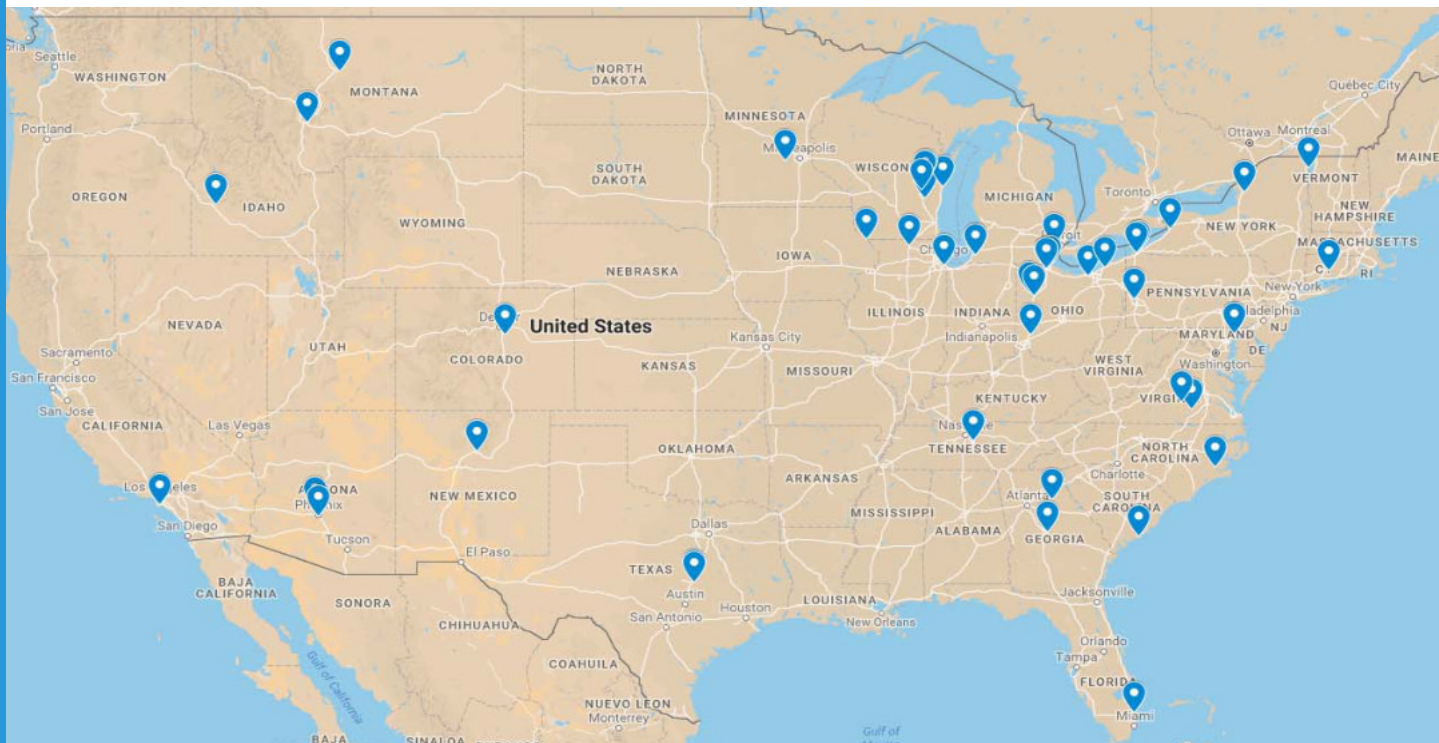

Inclusive Environment

In a private school, you will likely get to meet all the students in your class and be in a setting where you can fully participate. It is a lot easier to get on the high school football team or volleyball team without experience when you are in a smaller school.

Gain a U.S. High School Diploma!

You can have both an academic and cultural experience. The focus of most private schools is preparation for college with SAT, ACT prep, counseling and college visits. Graduation is also available in many of our schools for students who meet requirements.

Where will you call “Home”?

ADVANCED HIGH SCHOOL CLASSES

Honors Classes: For higher achieving students, usually involving additional subjects covered in greater depth.

Advanced Placement (‘AP’) Classes: Follow a standard curriculum, equivalent to college-level courses. Most US universities recognize these courses for credit, upon successful completion of AP final exam.

Dual Enrollment: Where you have the opportunity to take an actual college course during your High School year.

STEM Program: Programs within schools that emphasize Science, Technology Engineering and Math.

International Baccalaureate (‘IB’): A highly respected program of international education that is said to develop the intellectual, personal, emotional and social skills needed to live, learn and work in a rapidly growing world.

THE TIME IS NOW!

Many students don't choose to study abroad until they start college. So by applying in high school, you are getting an educational head start. Immersing yourself in an educational system other than your own gives you the opportunity to experience new cultures, meet new people and be apart of new traditions. It gives you a different perspective on life and will open your eyes to a whole new world of possibilities. We are there every step of the way to encourage, uplift and support you through this new chapter in your life. There is no better time to start than NOW!
